

JACOB FLORES

Chicago, IL | jfloresg@iwu.edu | 309-612-6685 | linkedin.com/in/jjacobflores | jacobflores.github.io/portf/

EDUCATION

Illinois Wesleyan University | Bloomington, IL

May 2026

Bachelor of Science (BS) in Computer Science | Minor in Data Science

- **Relevant coursework:** Software Development, Artificial Intelligence, Deep Learning, Models of Computing, Applied Data Analysis, Computational Organization-Architecture, Algorithm Design & Analysis, Programming Languages, Computer Networking, Advanced Web Design
- **Certifications:** AWS Cloud Solutions Architect Professional by AWS, Data Analytics by IWU
- **Leadership Experience:** Computer Machinery Association, AI Club, Spanish Teaching Assistant
- **Awards:** PhiGammaDelta Courageous Leader Scholarship, HispanicBusinessNetwork Scholarship, Deans List
- **Languages:** English & Spanish

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, C++, C, HTML/CSS, Haskell, Prolog, Forth, MIPS
- **Frameworks & Libraries:** PyTorch, NumPy, Flask, Scikit-learn, Pandas, Matplotlib, Bootstrap, Bulma, FastAPI, Streamlit
- **Tools:** Git, VSCode, PyCharm, MySQL, SQLite, MongoDB, Figma

EMPLOYMENT EXPERIENCE

AI Intern | *FOREO* | Remote (Stockholm, Sweden)

September 2025 - Present

- Lead a 3-member AI development team to design and implement an influencer analytics platform, integrating personalized AI chatbot and recommendations, automated data pipelines, and real-time dashboards
- Develop automated daily/weekly CSV ingestion pipelines in Python to provide real-time influencer insights
- Design interactive, role-based dashboards visualizing engagement, clicks, conversions, and payouts to inform marketing strategy

IT Help Desk Associate | *IWU Information Technology* | Bloomington, IL

August 2023 - December 2024

- Assisted over 40 walk-in clients and answered around 80 incoming calls per week with technical support.
- Monitored a web-based system, promptly responding to client questions and managed voicemails weekly.
- Accurately documented client interactions in all mediums, troubleshooting and resolving 85% of issues independently, escalating/referring the remaining 15% as appropriate.

AI Trainer and Evaluator | *Outlier* | Freelance

May 2024 - October 2024

- Evaluated 40 AI-generated writings per week for accuracy and correctness, improving AI model performance.
- Provided constructive feedback to 100+ human writers, enhancing the quality of AI-generated content.
- Crafted exemplary responses to prompts, demonstrating strong writing style and best practices in AI language.

PROJECTS

American Sign Language Recognition | Python(PyTorch, OpenCV, NumPy, Matplotlib, Seaborn, Pandas)

- Built a real-time ASL recognition model (ResNet18) achieving ~90% accuracy on 80K+ images
- Developed a web app using Flask + Bulma for live webcam gesture prediction and end-to-end AI deployment

Workout Planner | Python(Flask, Pandas), MySQL, HTML, Jinja2, CSS(Bulma), JavaScript

- Developed a full-stack web app using agile approach for personalized fitness plan with real-time data handling
- Designed a responsive, scalable interface with optimized server-client interactions and integrated MySQL

AWS Automated CI/CD Pipeline | CodePipeline, CodeBuild, CodeDeploy, S3, CloudFormation, CloudWatch, EC2

- Built a fully automated CI/CD pipeline on AWS to streamline builds, testing, and deployments
- Applied IaC with CloudFormation to provision secure, scalable env. with repeatable, error-free deployments

Distributed Denial-of-Service (DDoS) Simulation and Mitigation | Cloudlab

- Simulate real DDoS vectors (SYN, HTTP, amplification) and measure system failure thresholds under attack
- Automate packet-level monitoring to evaluate mitigations (SYN cookies) restoring service stability
